

Maciej (Mac) Adryan

Data Engineer • Builder • Automator

Languages: English (C2) • Polish (Native)

Building lean, reliable data systems and automating workflows end-to-end.

Passionate about scalable design, rapid iteration, and clean engineering enhanced with AI.

Experience

S&P Global *Junior Data Engineer (March 2022–Dec 2023) -> Data Engineer (Jan 2024–Now)*

- Currently building modular AWS Step Function workflows unifying two major data platforms into one scalable pipeline.
- Modernized legacy data systems, cutting runtimes by **80%** and delivering 30× faster processing on Snowflake.
- Developed reusable ingestion components and led POCs for supply-chain optimization.
- Earned the **Bladerunner Award** for innovation and measurable impact.

Intel *Software Development Intern • 2021–2022*

- Automated hardware testing with a Python + Dash web app, boosting efficiency across engineering teams.

Skills

Cloud & Data: AWS (Step Functions, Aurora, Lambda, ECS, RDS, S3, CloudWatch etc.), GCP (BigQuery), Snowflake, Redshift, PostgreSQL, SQL Server, DynamoDB.

Data Engineering: ETL/ELT, dbt, Terraform, Docker, CI/CD (GitHub Actions, Azure Pipelines).

AI & Automation: MCP, RAG pipelines, LLM APIs (OpenAI, Gemini, Claude), agentic workflows.

Programming: Python (Pandas, Flask, FastAPI), SQL, .NET, REST, GraphQL, SwiftUI, React Native.

Soft Skills: Strong ownership, creative problem-solving, can-do attitude, goal-oriented mindset, excellent communication, adaptability, attention to detail, rapid iteration, and clean system design.

Projects

AI-Powered Returns & Compliance App: SwiftUI app integrating **MCP**, **PostgreSQL**, and **Gemini API** to automate contextual reporting and product-return tracking.

Global Supply Chain Optimization: Delivered a **Snowflake + AWS** data architecture achieving up to **30× faster** queries; automated SQL Server flow migration to **Snowflake + S3** for improved reliability and scale.

Performance Analysis of Query & Aggregation Operations (Master's Thesis): Designed and implemented a cloud benchmarking system comparing **columnar (BigQuery)**, **row-based (Aurora PostgreSQL)**, and **NoSQL (DynamoDB)** databases. Fully automated deployment and testing using **Terraform**, **AWS Step Functions**, and **Lambda**, enabling consistent, reproducible results across environments.

Education

M.Eng. Computer Science — Data Science, Polish-Japanese Academy of IT (2025)

B.Eng. Computer Science, Gdańsk University of Technology (2023)

More About Me

Data Engineer passionate about building scalable, maintainable data systems that turn complexity into clarity. Experienced in designing and optimizing pipelines across AWS and Snowflake environments, with a strong focus on automation, cost efficiency, and data quality.

Recognized with the **Bladerunner Award** at S&P Global for leading a large-scale cloud migration and driving delivery through constant feedback and close collaboration with cross-functional DataOps teams. Despite being just a Junior, served (and delivered) as the primary engineer responsible for implementing and deploying key pipeline components, ensuring reliability and smooth handover across systems.

Brings a solid software engineering foundation (Python, .NET) and hands-on experience in modern data tools such as Terraform, Snowflake and AWS Step Functions. Known for bridging technical and business needs—communicating clearly with stakeholders, driving delivery, and simplifying architecture for long-term reliability.

Currently exploring the intersection of data and AI—experimenting with LLM APIs, RAG pipelines, and automation workflows to make data systems smarter and more adaptive.

I agree to the processing of personal data provided in this document for the purpose of the recruitment process, in accordance with the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, repealing Directive 95/46/EC (General Data Protection Regulation).

Wyrażam zgodę na przetwarzanie moich danych osobowych dla potrzeb niezbędnych do realizacji procesu rekrutacji, zgodnie z ustawą z dnia 10 maja 2018 roku o ochronie danych osobowych (Dz. Ustaw z 2018, poz. 1000) oraz zgodnie z Rozporządzeniem Parlamentu Europejskiego i Rady (UE) 2016/679 z dnia 27 kwietnia 2016 r. w sprawie ochrony osób fizycznych w związku z przetwarzaniem danych osobowych i w sprawie swobodnego przepływu takich danych oraz uchylenia dyrektywy 95/46/WE (RODO).
